PROFESSIONAL SUMMARY

I am a seasoned Full Stack Developer with half a decade of experience. My strong foundation in both front-end and back-end technologies enables me to consistently deliver robust and scalable solutions. I am dedicated to continuous learning and hold certifications in JavaScript, React, Frontend Development, and Artificial Intelligence.

SKILLS

- React
- MySQL
- Redux
- Tailwind
- Next
- MongoDB
- Node

WORK EXPERIENCE

CHIEF TECHNOLOGY OFFICER   03/2023 – Present

Taytute, Ibadan

- **Project Management:**
  I lead a team of amazing engineers to build a hiring management system which integrated with different third party API's such as Paystack, Zoho, to mention but a few.
- **Web development:**
  I handled the refactoring of code from React to Next to help improve website's SEO ratings. Also I made use of the trending technology stacks, such as Next, Prisma, Socket, Tailwind in the process of converting figma designs into a working product
- **Database Management:**
  Orchestrated server-side logic and database operations to guarantee efficient functionality and data integrity. Implemented scalable and optimized solutions for robust performance under high traffic.
- **Documentation:**
  Maintained comprehensive and organized documentation, facilitating knowledge transfer and easing on-boarding processes for team members.
- **Troubleshooting and Optimization:**
  Identified and resolved complex technical issues, employing analytical skills to optimize application performance. Implemented improvements and updates to enhance overall system efficiency.
- **Testing:**
  Furthermore I handled the deployment of code, creating a deployment pipeline and code versioning with Git, also wrote negative and positive test cases for code coverage as well as unit test for components

Furthermore I handled the deployment of code, creating a deployment pipeline and code versioning with Git, also wrote negative and positive test cases for code coverage as well as unit test for components

LEAD SOFTWARE ENGINEER
05/2022 – 01/2023

Fitted, Lagos

- **Order Management System Development:**
Led the development of a comprehensive Order Management System (OMS) that streamlined the entire order lifecycle from purchase to delivery, ensuring efficiency and accuracy.

- **Design Implementation:**
Transformed Figma designs into responsive and high-quality code, enhancing the user experience with pixel-perfect accuracy.

- **Order Management System Enhancement:**
Enhanced the OMS by implementing key functionalities such as payment processing, dispatch management, embroidery integration, VoIP calls, messaging, and extensive code refactoring to improve performance and scalability.

- **Bug Fixing and Troubleshooting:**
Proactively identified and resolved code issues, ensuring a seamless and bug-free application performance through meticulous troubleshooting and debugging.

PRINCIPAL ENGINEER
09/2018 – 12/2021

OIRS (Osun Internal Revenue State), Osogbo

- **Receipt Generation System Development:**
Developed a sophisticated receipt generation system for a state tax organization, ensuring precise accuracy and adherence to tax regulations.

- **System Enhancement and Maintenance:**
Engineered additional functionalities and conducted comprehensive system refactoring to significantly enhance efficiency and usability.

- **Bug Fixing and Troubleshooting:**
Diagnosed and resolved intricate technical issues, ensuring the system's unwavering stability and reliability.

- **Data Integrity and Security:**
Safeguarded data integrity and security by implementing advanced encryption and rigorous validation protocols.

- **Documentation:**
Curated comprehensive and well-organized documentation, streamlining knowledge transfer and simplifying onboarding processes for team members.
